

APC Smart-UPS

Your customers need reliable back-up power to keep their businesses running. They need a UPS that helps them lower TCO, save time, and reduce hassle.

Smart-UPS™ provides intelligent and efficient network power protection, plus easy remote monitoring and longer-lasting batteries.

APC SmartConnect

- Makes Smart-UPS the **first cloud-enabled UPS for distributed IT**
- APC Renewal Support—automatically sends you qualified leads and generates recurring revenue for your business
- Included on most Smart-UPS devices
- Free secure remote monitoring
- Accessible from any internet-connected device
- Automatic firmware updates
- No special software, SNMP trap, or coding required
- Proactive actionable alerts and lifecycle recommendations
- Free additional 1-year battery protection plan when you connect

Lithium-Ion Battery Technology

- Available for most Smart-UPS devices
- Two times the battery lifecycle than lead acid batteries
- Excellent battery performance at higher ambient temperatures up to 40°C/104°F
- Lower TCO up to 47%
- Shorter form factor
- 30% lighter batteries for cost-effective shipping and installation
- Fully compatible with APC wall-mount enclosures

The Smart-UPS Family Benefits and Features

- Entry level to scalable runtime
- Rack/tower convertible
- TAA compliant
- **Lithium-ion battery technology**
- **APC SmartConnect remote monitoring**
- Safe shutdown with PowerChute software
- Intelligent battery management
- High-efficiency green mode and Energy Star Compliance

Smart-UPS

- Power management options for every application and budget
- 420VA–3000VA
- Ideal UPS for servers, point-of-sale systems, routers, switches, hubs, and other network devices—from the core to the edge

Smart-UPS On-Line

- High-density, double-conversion online power protection for your most critical applications
- 1KVA–20KVA
- Great for servers, voice and data networks, medical labs, and light industrial applications

CONNECTED

Racks

Next-generation IT rack enclosures to fit every need:

- Enclosures and 4-post racks: 24U–48U
- Wall-mount: 6U–12U (Lithium-Ion Smart-UPS fits like a glove)
- Ability to ship fully configured with IT gear to save installation time and cost
- Broadest integrated rack system portfolio in the market
- The most Cisco-validated racks for shipment in the industry
- NetBotz HID compatible for increased security and control
- Wide selection of heights, widths, depths, and accessories

PDUs

Options for any IT environment:

- **Configure-to-Order PDU Architecture**—design a solution from the ground up with streamlined processes, competitive pricing, and fast turnaround.
- **Standard PDUs**—Choose from a wide array of PDUs that you can rack mount without tools. Metered, switched, connected, configurable, with outlet-level control and field-replaceable network management module.

Micro Data Center Xpress

Want all of this in one solution? Micro Data Center Xpress offers a complete, pre-integrated solution that's pre-installed and shock packaged for safe delivery.

Environmental Monitoring

NetBotz provides environmental threat protection for all types and sizes of environments with EcoStruxure IT Expert integration and user-defined alerts. Entry level (NetBotz 250) to expansive, complete solutions with HD cameras (NetBotz 750 rack-mount, NetBotz 755 wall-mount).
