

ADVANCED BACKUP AND RECOVERY FOR SMALL OFFICES

Backup is essential for protecting business data from numerous threats, including hardware failures, outages and viruses. Carbonite offers small offices powerful cloud and hybrid backup that's affordable and easy to use, with the flexibility to accommodate both simple and complex computer/server environments.

Simple Pricing

Protect all the computers, external hard drives and physical or virtual servers across an entire business for one low price with no added capital expense (CAPEX).

Award-Winning Support

Get help installing, setting up or troubleshooting via phone, online chat or email from our dedicated U.S.-based business support team.

Point-in-Time Recovery

Backup is an essential part of an effective anti-virus strategy. Revert to previously saved files after a ransomware attack without ever paying a ransom.

Efficiency

Advanced features like image backup, Bare Metal Restore (BMR), and granular file or full system recovery options slash hours of time and complexity.

Security & Compliance

128-bit encryption, private key option, transport layer security (TLS/SSL)—supports FERPA, GLBA and HIPAA compliance, including business associate agreement (BAA).

Free Business Trial

Try our full-featured business bundle for unlimited computers, external hard drives and physical or virtual servers.
