TRANSFORMING HOW WORK WORKS

From our beginnings, ThinkPad has been changing the way work gets done. From the depths of the ocean to the top of Everest and beyond, the business world has relied on us to set new horizons and reach new heights. So much, in fact, that NASA embraced the ThinkPad on both the International and the Mir space stations. So, it’s no small wonder then, that we’ve sold over 150 million of these reliable devices. And we’re still at work—transforming it as we move ahead.

INNOVATION

• #1 business laptop in the world
• A known leader in innovation for over 25 years
• Many ThinkPad innovations come directly from customer feedback

ENGINEERING

• Highest-quality materials deliver the most compact, versatile form factors
• Legendary, best-in-class keyboard ensures strong ergonomics and comfort
• Winner of over 225 design awards for our T and X Series laptops, focused on business-first features

QUALITY

• Tested against 12 military-grade requirements
• 200+ extensive internal tests to ensure peak business performance
• Hinge tested over 30,000 times, corner drops, shock/vibration tests, etc.
WHY MAKE THE MOVE TO BETTER?
