Keep Your Business On With Veritas Managed Continuity Service

Protect your business reputation against any major disruption with a resilient cloud-based disaster recovery strategy

BE READY

Your enterprise is reliant on information, and the ability to access it through business applications and partners. Now, imagine what happens to your organization if it suddenly loses access to your applications, valuable information, and key systems. Perhaps from a major IT service outage or a catastrophic risk, including hurricanes, tsunamis, terrorism, or man-made disasters—either accidental or intentional, such as hacking attacks.

How ready your organization is might depend on how you respond to three questions:

- When was the last time you tested your continuity plan?
- Was your last continuity test considered a success?
- Who is responsible to get your applications up and running after a disaster?

Figure 1. IT events can be catastrophic to your business

As an enterprise, you need consumption based solutions, single point of service accountability, global capabilities, and adherence to compliance requirements, including data protection and data residency. The new style of business demands agility, security, and resiliency.

DXC Technology and Veritas have collaborated to bring you an innovative new cloud-based Recovery-as-a-Service solution. Managed Continuity Service provides reliable protection and right for service Recovery Time Objectives (RTOs) and Recovery Point Objectives (RPOs) for your critical business workloads across physical and virtual environments. With an automated and orchestrated approach, and service delivery experts at your call, your business gets quick recovery when needed at realistic cost across simple and complex environments.

GET QUICK RECOVERY AT REALISTIC COST

IT-based business processes are critical, with acceptable downtime and allowable data loss significantly diminished. No longer are recovery times of 24 to 72 hours—based on the last tape backup or manual processes—acceptable. You need a flexible and highly cost-effective solution—Disaster Recovery-as-a-Service (RaaS).

With Managed Continuity Service you can:

- Maintain continuity and availability of your essential and critical business processes.
- Get robust protection of complex IT environments, incorporating traditional and cloud IT.

RTO/RPO   COST SAVINGS

Figure 2. Meet SLAs without breaking the bank

- Greatly improve your continuity service levels through our leveraged facilities, equipment, personnel, and processes at a cost that's typically up to 50 percent less than in-house solutions.
- Use our as-a-Service billing model option, which is based on monthly consumption.
- Maintain the agility and flexibility of your continuity solution to easily support changes in your IT environment, people, and business processes.

INNOVATIVE FEATURES

Effective recovery with a strong return on investment (ROI)—Minimize your business disruptions with resumption of normal business processes in as little as four hours following a major business interruption, and replicate data with typically no more than 15 minutes of data loss. This is a significant reduction compared to tape-based or in-house disaster recovery (DR) solutions.

Physical and Virtual Workload Support—Managed Continuity Service protects virtual and physical assets to the DXC Global Continuity Recovery Centers. Your legacy business services on physical servers can now be recovered in a virtualized environment in the DXC Managed Continuity Cloud. And a single click can have the services restored to the physical server in your production data center.
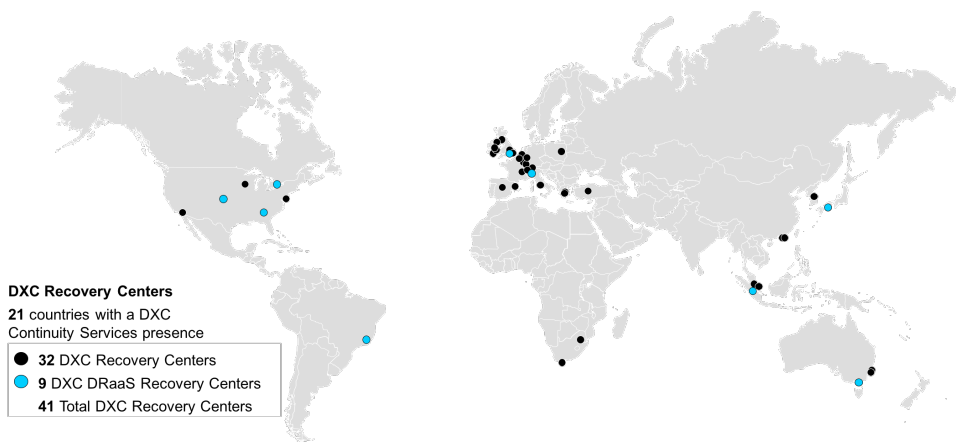

Visibility into continuity readiness—Get real-time awareness about your continuity readiness and current status of your environment via a universal dashboard showing the recovery status of your sites, clouds, and systems under contract. RTO and RPO targets are aligned to workload criticality and required compliance.

Secure and compliant—Be assured; our solution is compliant to industry security best practices, and provides encryption for data in flight and at rest. Regarding your requirements in data sovereignty and data residency, you can get in-country data hosting by the DXC Global Continuity Recovery Center nearest to your location.

Software-defined resiliency for hybrid clouds—Adopt and scale our solution it supports hybrid recovery environments—traditional IT and all kinds of cloud. To be protected, workloads scale from small to very large numbers and adapt to seasonal workloads. And your workloads are portable on your request across various DXC Global Continuity Recovery Centers.

DXC Recovery Centers
21 countries with a DXC Continuity Services presence
- **32** DXC Recovery Centers
- **9** DXC DRaaS Recovery Centers
- **41** Total DXC Recovery Centers

DXC Global Recovery Centers - Global recovery sites to support your data sovereignty and regulatory requirements

One accountable service provider with global presence—The services recovery operations personnel for the service are accountable for all aspects of the continuity service within the DXC Global Continuity site. You can trust our end-to-end accountability and service delivery excellence provided from a team performing continuity day in and day out.

Advice, transform, and manage services (optional)—Gain access to optional continuity plan services such as status reviews, or let us create, validate, audit, and run lifecycle management of your continuity plan.

WORK WITH VERITAS AND DXC

- **Partnership**—For 10+ years, DXC and Veritas have jointly invested, collaborated, and expanded the enterprise market through innovative joint solutions that address environments of all sizes, even hyper-large, complex enterprise environments
- **Choice**—You have access to a broad range of continuity options, which are aligned to the criticality of the workloads you need to protect. Our solutions span all delivery models—traditional, cloud, or hybrid.
- **Direction**—You interact with advisors and a managed services team who bring the collective knowledge of DXC and Veritas to develop continuity solutions that meet your needs.
- **Innovation**—You gain from industry-leading intellectual property—evolved from decades of experience supporting stock exchanges, financial institutions, and hospitals.
- **Low risk**—DXC places strict limits on the number of clients assigned to the same leveraged asset—15:1 versus unlimited, and enforce exclusion zones.
- **Success**—DXC has supported more than 966 disaster declarations with 100 percent success rate.
- **Compliance**—Your compliance needs are supported for industry regulation and security best practices, including ISO frameworks, SOC2, and IL3

ABOUT VERITAS TECHNOLOGIES LLC

Veritas Technologies empowers businesses of all sizes to discover the truth in information—their most important digital asset. Using the Veritas platform, customers can accelerate their digital transformation and solve pressing IT and business challenges including multi-cloud data management, data protection, storage optimization, compliance readiness and workload portability—with no cloud vendor lock-in. Eighty-six percent of Fortune 500 companies rely on Veritas today to reveal data insights that drive competitive advantage. Learn more at www.veritas.com or follow us on Twitter at @veritastechllc.
