

DMV

Most Department of Motor Vehicles are not just responsible for the governance of drivers licensing and automobile registration, they do so much more including passport services, change of address forms, and voter registration. In addition to the high volume of documents flowing through their office, they must comply with personal privacy and security legislation. All of this can be costly including the investment in document management solutions and storage space.

Challenges:

- Processing high volume of personal identification documents
- Requires secure workflow and storage of personal identification data
- Meeting Real ID initiatives
- Sharing of records across other government offices
- Much needed office space taken up with multiple devices
- Need quick processing for fast customer service

Let's Talk Real ID

The fi-800R is the ideal solution for Real ID initiatives:

- Scans passports, without carrier sheet, in 4.7 seconds
- Reverse feeds passports quickly and smoothly
- Reduces operational space
- No need for multiple devices
- Expedites wait time for customers

Document Types:

- | | |
|--|--|
| <ul style="list-style-type: none"> • Drivers license applications & testing • Proof of ID; birth certificates, social security cards • Vehicle registration forms • CAV decal applications • Handicap parking permits | <ul style="list-style-type: none"> • Smog check reports • Voter registrations • Change of address forms • Traffic ticket payments & receipts |
|--|--|

Converting all of these documents into a digital format is critical for modern DMV offices. Document management solutions provide a fast way to digitize, organize and store. Additionally, finding these documents becomes as easy as a simple Windows style lookup and enables sharing of records quickly across departments and other government divisions. Going digital will also help reduce the number of filing cabinets, opening up costly office space. By automating processes that were once manual, scanning can reduce human errors and ensure compliance by digitizing documents, then saving and storing them through a secure electronic process.

FUJITSU #1 Leader in Document Imaging

Fujitsu's newest and most innovative scanner is the fi-800R, the most compact and versatile scanner in its category. Because of its design, it can fit into the tightest of spaces. While it's small, it has robust features providing excellent performance in batch scanning and thick document scanning including passports. The return scan feature allows scan operators to stand in one place and scan thick documents that return back to the starting position. The Machine Readable Zone (MRZ) on passports is recognized and the meta data is extracted for fast client retrieval. The fi-800R is the perfect document scanner for DMV front and back office use.

fi-800R Scanner Features

- Fast **40 ppm** / 80 ipm
- **20 page ADF** for batch scanning
- Thick document scanning (up to 5mm thick) such as passports and ID cards
- **Ultra compact size** – More than 30% smaller than competitive scanners in the category
- **Return Scan** – scans and reverses flawlessly. No carrier sheet needed
- **U-Turn Scan** – saves operational space as no exit tray is needed. Scanned documents return on top of the scanner
- **Active Skew Correction*** - an industry first! Individual functioning rollers ensure straight pages
- **Automatic Stacking Control** – documents are scanned from the top and return to the top in a smooth and neat batch
- **Face recognition** – ID cards or passports scanned upside down or backwards are automatically rotated to the correct position
- **MRZ Code recognition** and data extraction

In-Box Software Features

PaperStream IP (PSIP) is a TWAIN/ISIS[®]-compliant driver and PaperStream Capture

- **Advanced Image Cleanup** corrects the toughest documents, including colored and decorated backgrounds, to improve OCR and reduce rescans
- **Assisted Scanning** lets you choose the best image cleanup through visual selection
- **Blank Page Detection** removes blank pages automatically
- **Front and Back Merge** places two sides of a page into one convenient image
- **Ready-to-Go Profiles** or customize your own
- **Easy to Learn** user-friendly interface
- **Document Separation** features reduces paper prep time
- **Index and Sorting** to name files and route to your destination of choice
- **Convert** to searchable PDF, auto file and folder naming, document and batch separation, OCR and index meta data
- **Scanner Central Admin (SCA)** to remotely manage your entire fi Series fleet

Digital Transformation for the DMV
